NOTES:

Pistachio is a handsome tomcat who is searching for his purrfect match. He is a shy boy who will benefit from a patient family that can provide structure, consistency, and a calm environment as he adjusts to life outside the shelter. Giving Pistachio time to decompress and settle in at his own pace will help him build confidence and feel secure in his new home. He would do best with a mature family that understands relationships with shy cats take time to develop. With patience and the right environment, Pistachio is sure to blossom into a wonderful companion.
